

Erik Bui *Full Stack Developer*

✉ nameless20001027@gmail.com 📍 Oslo, Norway

Profile

Full stack Developer with 4+ years of experience in software development.

Completed and implemented numerous projects by participating in end-to-end development using the latest front-end frameworks, robust back-end technologies, and various database management technologies.

Extensive hands-on experience in integration while working on various business **AI-related** projects such as chatbots, face and voice recognition, and implemented **CI/CD pipelines** and **cloud infrastructure** automation to ensure smooth deployment and scalability.

Education

08/2018 – 06/2021
Oslo, Norway

Bachelor's Degree in Artificial Intelligence

Kristiania University College

- During my university years, volunteered for several projects to improve my experience as a full-stack developer.
- In particular, participated in the renewal of the **university management system**, and was evaluated as a promising student by successfully completing difficult update tasks and maintaining high-quality and scalable code.
- During the vacation period, improved my experience by leading a small team of 3-5 people and developing scalable and maintainable web and mobile applications that meet the needs of various customers.

Professional Experience

04/2024 – 05/2025
Grenchen, Switzerland

Senior Front end Developer

Breitling

- Leveraged **agile** product development methodologies to develop high-performance, visually stunning web applications built on **TypeScript**, **React**, and **Next.js** to deliver seamless e-commerce and user-centric experiences.
- Integrated **Contentful**, Breitling's headless **CMS** for dynamic content management, to enable the marketing team to streamline updates and deliver personalized content with minimal deployment overhead.
- Designed a fully responsive, mobile-first user interface supporting **40+** global markets, including right-to-left languages and regional layouts.
- Leveraged **CDN caching** and **Next.js' advanced lazy loading technology** to improve web performance, ensure **99.9%** uptime, and optimize global user experiences.
- Implemented Breitling's advanced analytics and marketing solutions using **Google Tag Manager (GTM)**, customizing event trackers, and integrating with Google Analytics to deliver actionable customer insights.

- Worked closely with Breitling’s design and digital marketing teams, we implemented interactive and fully responsive front-end components for the **luxury product offering**.
- Leveraged **Vercel**, we built an automated **CI/CD pipeline** for Breitling’s web applications, reducing deployment times by **40%** and automating testing across development environments.
- Supported **cloud-based** application development to optimize resource allocation on **AWS**, reducing infrastructure costs by **25%**.
- **Supported junior developers** while maintaining a robust TypeScript and React ecosystem, ensuring continuous deployment and best-practice testing.

10/2021 – 02/2024
Oslo, Norway

Full Stack Developer

AbsoluIT AS

- Worked closely with my **Agile** team to turn **UI/UX** designs into clean, maintainable code and kept our codebase organized with regular updates.
- Collaborated with clients from different industries to build backend apps tailored to their specific needs, which helped cut project loading times by about **25%** and boosted user engagement by **15%**.
- Created **RESTful** and **GraphQL APIs** so the frontend and backend could talk smoothly, which sped up development by around **15%**.
- Improved our system to handle large images and videos in real time using a unified **API** for **AI** model inference, cutting generation time by **25%** and increasing overall performance by **40%**.
- Participated in implementing **cloud-based** solutions utilizing **AWS** and **Azure** and was **mentored by** senior developers.
- Helped customers adopt best practices for development workflows, like setting up **CI/CD pipelines** and **version control**, which led to better user experiences and happier clients, especially in e-commerce.
- Took on **new tech** challenges regularly and quickly learned new skills, helping maintain the company’s strong reputation.

Skills

Programming Languages

HTML, CSS, JavaScript, TypeScript, Python, Go

Back end

Node.js, Express.js, Nest.js, Django, PHP

DevOps/Testing

Docker, Kubernetes, AWS, GCP, AZure, Git, GitLab, GitHub, Jira, Jenkins, Jest, Cypress, Postman

Front end

HTML, CSS, React, React Native, Next.js, Angular, Vue.js, Nuxt.js, TailwindCSS, jQuery

Database

SQL/MySQL, PostgreSQL, MongoDB, Redis, DynamoDB

Blockchain Technologies

Solidity, Web3.js, Ethers.js
